

APPENDIX A – Environmental Policy

Saint Nikola Wind Farm – Kavarna Environmental Policy

AGE owns and operates the Saint Nikola wind farm that generates renewable energy and supplies it into the local electricity infrastructure.

Saint Nikola wind farm is committed to:

- Meeting or exceeding the requirements of environmental rules, regulations and 'other requirements' imposed by local, regional and national governments and participating financial institutions
- Preventing pollution of the environment and continually improving environmental performance
- Annually setting and reviewing environmental objectives and targets based on the significant aspects of the activities
- Communicating this policy to all employees, subcontractors and members of the public
- Meeting or exceeding the requirements imposed by AES Corporation environmental standards.

Saint Nikola wind farm established these commitments to the environment as part of the company's shared values. AES Wind Bulgaria employees are encouraged to develop a balanced approach to meeting these commitments, one that considers all environmental requirements and standards, as well as the needs of all stakeholders (including social and other needs of the local community).
